

MONOSLOPE

ClearSpan Monoslope Building creates an environment for cattle, maximizing business potential

ClearSpan Monoslope Buildings are a new take on an agricultural classic. The Monoslope allows operations to create an environment that cattle can thrive in, leading to higher gains and profits. With ample space for housing, feeding, manure management and more, Monoslopes can optimize any operation.

The ClearSpan Monoslope Building Advantage

Promotes optimal temperatures year-round - When taller side is south facing, the design naturally provides cooling shade in the summer and warmth in the winter.

Solid or slotted floor options - Slotted floors feature a manure pit. Solid floor buildings have additional 20'L for manure management.

Enjoyable working environment - 30' of length provided for added workspace.

Spacious Interior - Operate vehicles and machinery, and easily move livestock within the structure. Features an open front wall and adjustable back wall curtain that protects livestock.

Durable construction - Built with USA-made, triple-galvanized structural steel that is covered by metal roofing and siding.

Industry-leading warranties - 50 years on the frame and 25 years on the metal cover.
