

BEEF MASTER

ClearSpan Beef Master Systems

promote healthy and productive businesses

ClearSpan Beef Master Systems were designed with both the farmer and cattle in mind. With an open, comfortable environment for cattle and a layout that optimizes efficiency, these structures reduce wasted feed and costs, boosting profits for any operation.

The ClearSpan Beef Master Systems Advantage

Healthier cattle - Provides an optimal controlled environment for cattle. It keeps them safe and out of the elements with fewer injuries and leads to higher gains, maximizing profit.

The feed shield - A 4' overhang that frees up internal space, protects feed from inclement weather and allows livestock to be fed in a controlled environment.

Ridge vent - Reduces moisture and maximizes air exchange.

Constructed from triple-galvanized steel truss arches that are corrosion-resistant and built to last.

Heavy-duty base plate included.

Available up to 65' wide and 240' long. Customers may also request custom lengths.

Covered with a 12.5 oz., 24 mil white premium cover - Industry leading 20 year warranty.
