

FREESTANDING

ClearSpan Freestanding Buildings are a fraction of the cost of metal or wood structures

ClearSpan Freestanding Buildings are an ideal alternative to traditional buildings. Without sacrificing dependability, they are significantly less expensive. These structures utilize a unique and versatile design that makes them ideal for just about any application in any industry.

The ClearSpan Freestanding Building Advantage

Constructed with a triple-galvanized, 14-gauge steel frame - Corrosion resistant and dependable.

Covered by a 12.5 oz., 24 mil fabric cover - Natural lighting reduces energy costs.

Versatile design - House livestock or store hay, feed, vehicles, equipment and more.

Economical prices - Little or no property taxes. Low cost per sq. ft.

No internal support posts - Maximum amount of usable space.

Buildings over 20'W - Come with predrilled, heavy-duty base plate.

Optional accessories - End walls, roll-up sides, insulation and more are available.

Quick construction timeline - Build on any surface.
